This is a communication from the examiner in charge of your application. COMMISSIONER OF PATENTS AND TRADEMARKS

			18/91	This action is made final.
This application has been examined	Responsive to communic	ation filed on		
A shortened statutory period for response Failure to respond within the period for re	to this action is set to expire sponse will cause the application t	month(s), o become abandone		om the date of this letter.
Part I THE FOLLOWING ATTACHMEN	NT(S) ARE PART OF THIS ACTIO	N:		
Notice of References Cited by Notice of Art Cited by Applica. Information on How to Effect I	nt, PTO-1449.			stent Drawing Review, PTO-948. t Application, PTO-152.
Part II SUMMARY OF ACTION				
1. Claims	1-24	<u> </u>		are pending in the application.
Of the above, claims			are	withdrawn from consideration.
2. Claims				have been cancelled.
3. Claims				_ are allowed.
3. Claims	1-24			are rejected.
5. Claims		<u> </u>		are objected to.
6. Claims		are	subject to restricti	on or election requirement.
7. This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.				
8. Formal drawings are required in	response to this Office action.			
9. The corrected or substitute drawings have been received on Under 37 C.F.R. 1.84 these drawings are acceptable; not acceptable (see explanation or Notice of Draftsman's Patent Drawing Review, PTO-948).				
10. The proposed additional or subsexaminer; disapproved by the	stitute sheet(s) of drawings, filed or ne examiner (see explanation).	1	has (have) been	□ approved by the
11. The proposed drawing correction	n, filed, h	as been approve	d; disapproved	i (see explanation).
12. Acknowledgement is made of the	e claim for priority under 35 U.S.C n, serial no.	. 119. The certified c	opy has been	received not been received
13. Since this application apppears accordance with the practice unit	o be in condition for allowance exc der Ex parte Quayle, 1935 C.D. 11	ept for formal matter ; 453 O.G. 213.	s, prosecution as t	o the merits is closed in

1. Claims 1-24 are presented for examination.

2. Claims 1-24 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims "presumptive geometric relationship" is vague and indefinite as a result of manipulating a selected object over an underlying object in a computer aided design system. In one sense, all relationships between objects on a display are presumed. For example, all overlapped objects are presumptive because true overlap is impossible on a two dimensional display. In another sense, if one considers the three-dimensional moded space abstraction, then all object relationships, although virtual, are real in that space, i.e., none are presumed.

Further, "floating" is vague and indefinite.

3. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102

-3-

Serial Number: 08/436,158

Art Unit: 2412

of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

4. Claims 1, 21 and 24 are rejected under 35 U.S.C. § 103 as being unpatentable over Newell et al.

Newell et al. rendered obvious claim 1 by teaching the claimed graphic object within a proximity of another graphic object, manipulating into a presumed relation and maintaining while pointing at figures 2A-2B and at columns 4-5. In this case the presumed relation is a coincidence between the pointer and end point. The claimed rules can be considered the rules that make certain points of Newell et al. recognized as interesting.

While Newell et al. teaches most features claimed, it is noted that floating is not explicitly taught.

However, it would have been obvious to consider a proximate distance as floating because this permits objects to interact throughought a range with the same effects.

Claims 21 and 24 are similar to claim 1 and are rejected under a similar rationale.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Almis Jankus whose telephone number is (703) 305-9795.

Serial Number: 08/436,158

Art Unit: 2412

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-9600.
